

HIGHER EDUCATION SUSTAINABILITY PROGRAMME

— tailored to your curriculum —

ENGAGE | INNOVATE | THRIVE

Be a world-leading
educational institution

OUR UNIQUE APPROACH

Our educational approach is flexible and adaptable

Wherever you are on your sustainability journey, we can work closely with you to develop bespoke courses which meet your needs.

- ▶ Available at all levels, including Bachelors, Masters and MBAs
- ▶ Combination of engaging passive and active learning
- ▶ Delivery of modules can be adapted to cater for your preferred teaching and learning style, such as remote learning, blended courses or face to face lectures and seminars.

Our programme is designed to provide students with greater insight and understanding of the planet and the evolution of our world.

Empower your students to measure the impact of their choices and to genuinely embed sustainability and circularity in their professional careers; enabling them to become successful entrepreneurs and leaders of the future.

MODULE OPTIONS INCLUDE

Earth Systems

- ▶ Providing initial insights and principles into the Earth's systems and the planetary boundaries we can operate within.

Sustainability Governance

- ▶ Exploring the Anthropocene era, sustainable development, environmental law and evolution of corporate responsibility and ESG (Environment, Social and Governance).

- ▶ Provide your students with the latest findings and insights on sustainability.
- ▶ Empower them to be successful front-runners; impacting our world and shaping our common future.

Circular Economy

- ▶ Learning how to achieve a clean and zero-carbon business whilst building a strong collaborative network.

Resilience and Innovation

- ▶ Adapting, transforming and harnessing digitalisation and cutting-edge technology to create sustainable cities and societies.

New World, New Opportunities

- ▶ Understanding geopolitics and uncovering opportunities to become a successful and impactful entrepreneur.

CONSULTING PROJECTS

To complete the student's learning journey and consolidate the acquired skills and expertise, we offer **real-world consultation projects** with collaborating businesses.

THE BRIEF

The business presents the sustainability challenges they are seeking to overcome and provides students with the background knowledge they need to begin the consultancy project and provide solutions.

THE PRESENTATION

With our support, students research and discover solutions, before delivering strategic recommendations and a tactical action plan to the business.

To prepare our students for the 21st century and guide them along sustainable pathways, a holistic approach is required whilst fostering innovation.

OUTCOME

- Students are ready for real challenges
- Improved analytical, ideation, and delivery skills
 - Consulting experience to showcase on their CV
 - Case study for student's portfolio

OBJECTIVES & BENEFITS

- 1 Understand 21st century challenges**
An introduction of local and worldwide challenges to develop critical thinking on subjects such as the Earth's climate system, the carbon cycle and global health.
- 2 Develop a green mindset**
Global citizenship develops a sense of responsibility to a common humanity, biodiversity and to the planet. It builds empathy and promotes diversity, inclusion and collective intelligence.
- 3 Build resilience**
The nature of the courses will create a mindset shift and promote behaviour change towards sustainable practices at individual and corporate levels. Students will learn to be mindful of operating within the planetary boundaries at all levels of personal and professional choice.
- 4 Innovate circularly**
Sustainability requires creative skills which are reinforced by stimulating the student's curiosity and imagination. A circular economy is achieved by developing systems thinking and problem-solving capabilities.
- 5 Thrive sustainably**
Together, students learn to shape a happy, common future by creating new business models and identifying opportunities to incorporate their sustainable skills and knowledge into their own professional careers.

MORE BENEFITS

Align with your institution's core values

Gain recognition as a front-runner

Nurture a green mindset and culture

Increase outreach and attract more students

Endorse and contribute towards the UN's 17 Global Goals

Reinforce your Corporate Social Responsibility (CSR) and achieve socially responsible procurement

“

We were particularly satisfied with our collaboration. This induction seminar on sustainable development and the circular economy was extremely well received by the new class of students, many of whom were discovering this approach and principles.

CSR and ethics are among the learning objectives of EBS Paris, this introductory seminar is perfectly inline with the school's desire to educate future graduates on these strategic issues. We have decided to extend the partnership to all years of study.

Marc du Peloux

Director of Programmes
European Business School

“

SUSTAINABILITY INSTITUTE's workshops on sustainable development are really engaging and effective in disseminating scientific knowledge and making it accessible.

They manage to address difficult issues like climate disruption or biodiversity loss in a positive way, insisting on the solutions available to us to maintain our planet in a viable state, spreading high-quality information across a wide range of groups of people.

Fiona Ross

Director
Business Junction

Empowering future leaders!

Having participated in our courses, will you change your behaviour

“

I'm going to radically change my behavior by doing everything I can to reduce my ecological footprint.

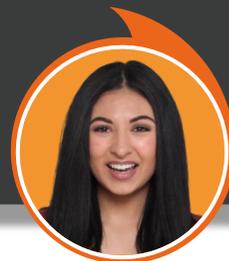

Ibrahim

“

I think that I will because it has had a real impact on me.

Ingrid

“

Your presence in the EBS Paris has allowed me and my classmates to change our vision on sustainable development and become aware of our daily energy expenditure.

Sara

“

Your course opened my eyes to the serious problem of climate change and the importance of achieving sustainable development goals to improve our quality of life.

On an individual level, I will educate myself more and educate people around me, buy and use things in moderation, reduce or avoid over-packaging.

Quentin

“

With the help of this course, I know how my behaviour should be improved in many ways so I can contribute to sustainable development. The dangers that our planet might be facing in the upcoming years make me realize how important sustainable development is.

Shirine

“

Thanks to this course, it has made it very clear that every small change is going to help to make a difference in this world. We must take action to try and make this world a greener place than it is now.

Thomas

SUSTAINABILITY
institute

sustainability-institute.org

Mission and vision

We are catalysts for a transition towards sustainable mindsets and cultures.

Why?

Because the future is here and we must act now!

How?

We provide knowledge and insight to motivate change for our societies to thrive.

We are an award-winning social enterprise and a front-runner in sustainability and circularity consultancy and training as well as producing educational resources and card games.
